

Schedule and News

*Brent is always available for emergency repair and scheduled maintenance. Keep in mind that near the end of May and continuing through August, Brent repairs and maintains all instruments for the Tippecanoe County Schools. For this reason, this time is not the most convenient for individual instrument annual maintenance. Routine maintenance is best scheduled for other school breaks during the year. If your student uses the same instrument for both marching and concert bands, it is best to schedule maintenance work done at the end of the marching season.

There is a bulletin board at Brent's Bench with contact information of people who have used instruments for sale.

Notable at this time is a buffet soprano clarinet in excellent condition. Call for details.

Tippecanoe County students who have school instruments for at home practice are required to bring the instrument to Brent's Bench at some point during summer vacation for an evaluation and possible maintenance. This is not necessary if the instrument was repaired just prior to sending it home.

Thank you.
